Static Code Analysis

⊙ Course	CSN
☑ Done?	✔

In this lab your task is simple, you have a list of vulnerable projects and you are required to an automated static code analysis (SAST). Below you will a list of vulnerable applications/projects as well as a list of suggested SAST solutions. pick at least 2 applications/projects and scan them with one of the suggested SAST solution.

Name	URL	Language
DVWA	https://github.com/digininja/DVWA	PHP
